Qe7 (spent: 0:00:10, left: 0:09:49) **Inaccuracy!** Black should have played knight from g8 to f6 instead. There was no need to panic from this position because f7 pawn is only attacked from one piece, so continue developing instead. You can also look for games which have similar strategy from opponent and practice any trap there

Qd8 (spent: 0:00:12, left: 0:08:32) **Mistake!** Black should have played pawn from b7 to b5 instead. e5 pawn is left hanging after moving queen, so it's not good. First do d6 to protect e5 pawn and then move queen if required (**7... b5 BestMove!** Threaten bishop at c4 and also build a strong pawn structure, although the long side castle is now not possible. 9. Nh4 (spent: 0:00:07, left: 0:09:24) **Excellent!**

Nxg4 (spent: 0:00:26, left: 0:09:03) **Blunder!** Black should have played knight from c6 to d4 instead. This is a big blunder because white is pointing towards right and all the attack pieces are open which includes dark and light bishops along with queen and knight

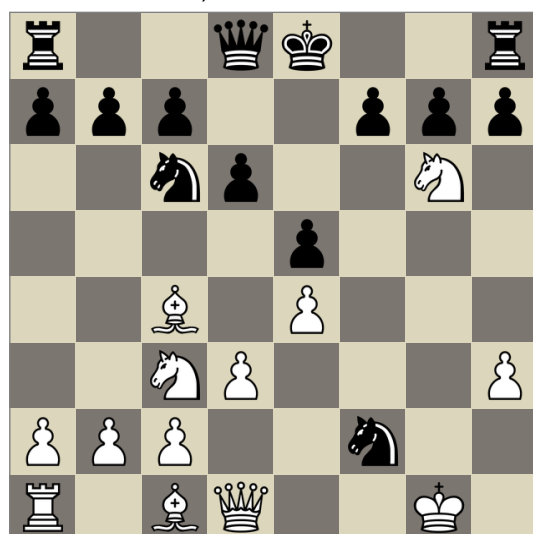

10. Nxg6 (spent: 0:00:06, left: 0:09:18) **Good!**

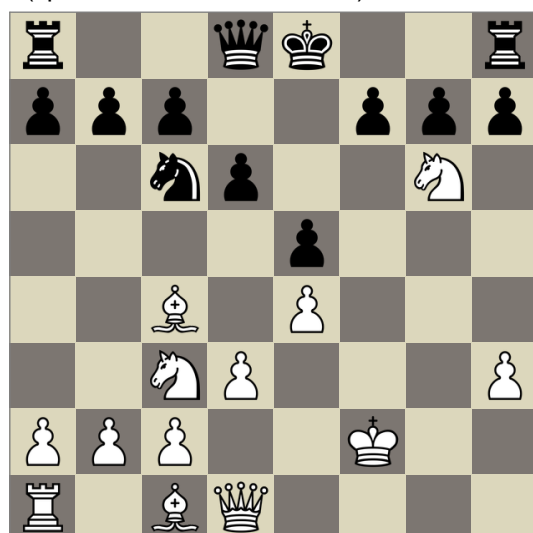

Bxf2+ (spent: 0:00:18, left: 0:08:45) **Mistake!** Black should have played pawn from h7 to g6 instead.

11. Rxf2 (spent: 0:00:12, left: 0:09:06) **Inaccuracy!** White should have played king from g1 to g2 instead. Instead of taking the bishop which is protected by knight at g4 move the king to g2. The overall idea is to move queen to f3 so that it attacks f7 pawn and then checkmate along with bishop at c4 (**11. Kg2 BestMove! Ne3+ Good! 12. Bxe3 BestMove! Bxe3 Blunder!** Black should have played pawn from h7 to g6 instead. **13. Bxf7+ BestMove! Kd7 Forced! 14. Qg4# BestMove!** This is the reason why taking black bishop by rook was a bad idea because of this possible checkmate.)

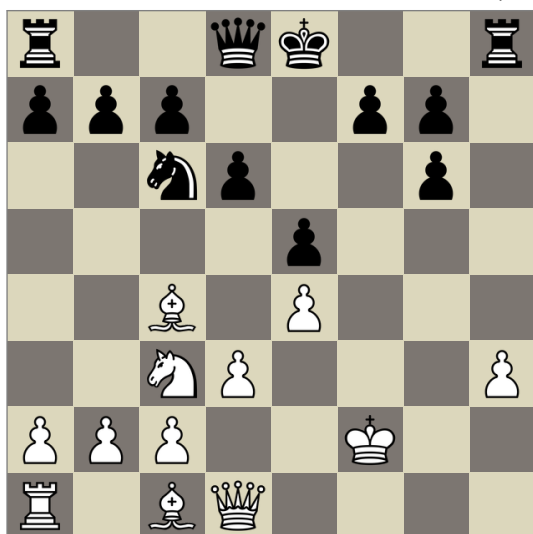

Nxf2 (spent: 0:00:01, left: 0:08:44) **BestMove!**

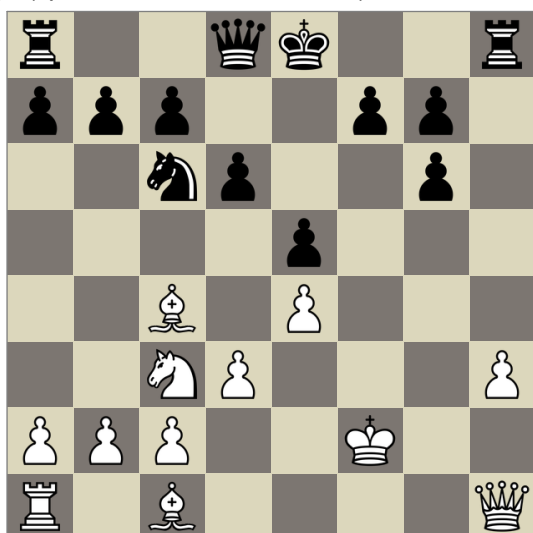

12. Kxf2 (spent: 0:00:03, left: 0:09:03) **Blunder!** White should have played queen from d1 to f3 instead. Instead of taking knight its better to move queen to f3 as discussed again and attack f7 pawn. Note that knight at g6 is attacking rook at h8 as well, so either its checkmate after Qf3 or the rook is gone.

(12. Qf3 BestMove! Nxf3+ BestMove! 13. Kf1 BestMove! It is a good move to keep queen as it is because of the possible checkmate in f7 square by the queen in the next move. Note that knight at g6 also threatens to take rook at h8 if black finds out the f7 checkmate. Notice that king in any other square is not a good idea because knight can again move and give check which we want to avoid and king at f1 cannot be under fork by black knight. **Ng5**

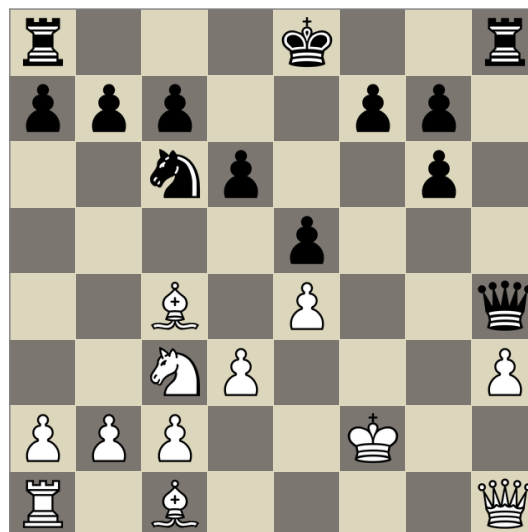

Inaccuracy! Black should have played knight from h3 to f4 instead. This move protects f7 square but rook at c1 can now take the black knight in the next move **14. Bxg5 BestMove! Qxg5 BestMove! 15. 10. d4 (spent: 0:00:14, left: 0:09:10) **Good!** Black bishop at h5 has pinned white knight with queen and going for attack with d5 is not good because knight is out of the fight (**10. g4 BestMove!** The king side pawn structure is no longer good, but this is probably the best move unpinning the white knight)

Qe7 (spent: 0:00:51, left: 0:08:31) **Excellent!**

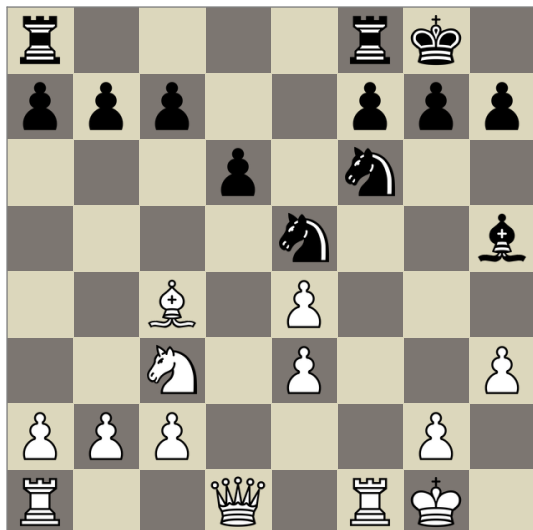

11. dxe5 (spent: 0:00:05, left: 0:09:05) **Mistake!** White should have played queen from d1 to d2 instead. White knight is pinned remember! Who will support this pawn now?

Qxe5 (spent: 0:00:09, left: 0:08:22) **Blunder!** Black should have played knight from c6 to e5 instead. This is a blunder and instead should have taken with black knight at c6 (**11... Nxe5 BestMove!** This is a much better move and notice that white's pawn structure is not that great with double pawn in the middle in e-file which cannot be supported by any of the pawns)

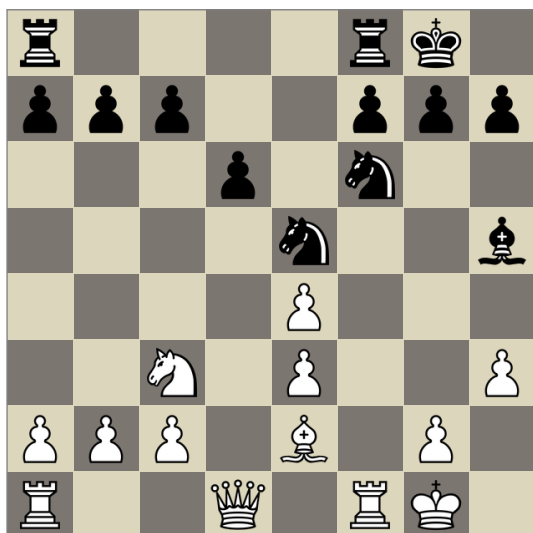

12. Nxe5 (spent: 0:00:02, left: 0:09:03) **BestMove!**

Nxe5 (spent: 0:00:04, left: 0:08:18) **Inaccuracy!**

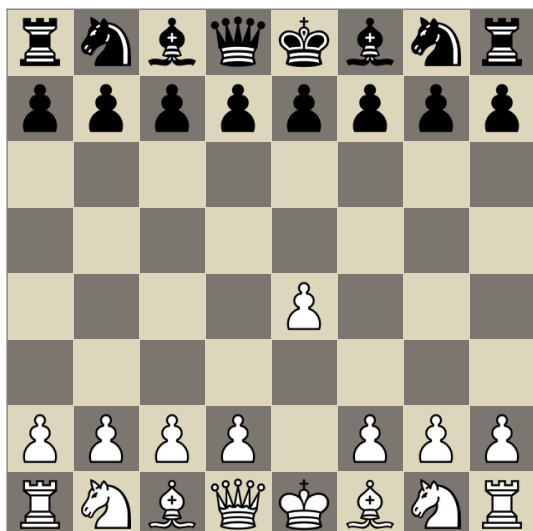

Black should have played bishop from h5 to d1 instead. (**12... Bxd1 BestMove!** This is a better strategy from black after loosing its queen to take it back **13. Nxc6 BestMove!** White capitalise on it's move and continues attacking, which is great **Bh5 Inaccuracy!** Black should have played pawn from b7 to c6 instead. White's knight is too powerful so saving black light squared bishop may not be such a great idea (**13... bxc6 BestMove!** Black can definitely take white knight, which is a good move considering its powerful in the center **14. Raxd1 BestMove!** White takes black light squared bishop and along with capture half open d-file with a1 rook, so now both d-file and f-file are half open and captured by white) **14.
